Re: *Orange Road Railroad Underpass – Property on Westwood Drive*

Dear Property Owner:

The Delaware County Engineer's Office is proceeding with the development of an engineering study for an underpass of the railroad tracks crossing Orange Road. During the study it may be necessary to do certain survey and field studies on your property within and directly adjacent to the existing road right-of-way.

Accordingly, we wish to advise that it will be necessary for survey crews to enter upon your property in the next few weeks to obtain field data in connection with this study. Section 163.03 of the Ohio Revised Code specifically authorizes such entries. The work crews have received strict instructions concerning the preservation of private property and public lands. In the event that any valuable vegetation must be cleared in order to accomplish the work, you will be notified and informed as to the procedures that must be followed by this office according to the Ohio Revised Code. In all cases, however, removal of vegetation, as well as other damage, will be held to a minimum. If at any time you feel that our representatives have not given proper attention to private property, please notify this office at once at the following address:

Delaware County Engineer
Attn: Ryan J. Mraz, Project Engineer
50 Channing Street
Delaware, Ohio 43015
740-833-2400

The field crews will not be able to give any definite information or answers to your questions; they will simply be collecting information necessary to provide engineering data for the study. Should the ultimate design of the project affect your property or lands, a representative from the Delaware County Engineer's Office will contact you as study information becomes available.

We sincerely appreciate your cooperation and assistance on this worthwhile project.

Sincerely,

Chris Bauserman, P.E., P.S.
Delaware County Engineer
